COMPANY INTRODUCTION

In the early months of 2023, Slenergy was founded by experienced experts in the international field of residential photovoltaics, along with a top-notch management team. It is committed to becoming a global leading provider of sustainable smart energy solutions by providing more efficient, reliable, economical, and convenient solutions and services. Its core products include standardized solutions applicable for all scenarios (residential, C&I, micro and off-grid, etc.), PV and energy storage inverters, smart junction boxes, portable energy storage products, smart energy management systems, etc. As a visionary player in the new energy industry, the company aims to upgrade the new energy sector with precision manufacturing and create rewarding products with innovative technologies.

Slenergy has inherited excellent "intelligent manufacturing genes" in technology research, product quality, intelligent manufacturing, and other aspects. Slenergy has set up R&D centers in Germany and China, and its production base is in Chuzhou, China. The core team has over 10 years of R&D and technology accumulation in PV products, with over 150 technical staff. The company has set up branches and customer service centers in Hong Kong, Germany, Spain, etc., and its overseas businesses cover the whole Europe. It plans to enter markets such as North America, Australia, the Middle East and Africa, Southeast Asia, Brazil, and other regions.

With the country's vision of achieving carbon peak and carbon neutrality and the introduction of stricter net-zero emission reduction plans globally and in various regions, Slenergy responds to the call and expects to help the entire industry achieve upgrading through the introduction of precision manufacturing and smart manufacturing and to transform energy independence into reality by building the capacity of the smart energy ecosystem.

Rooted in Top Brand manufacturing standards, create a new benchmark for the industry

Intelligent manufacturing
Improve the quality and efficiency

Advantage integration
Shorter process

Exquisite craftsmanship
Precision manufacturing

Intelligent systems
Intelligent management and control

Traceable results

iShare-Home

The current photovoltaic (PV) market presents a range of challenges that hinder efficiency and value across the board. At iShare-Home, we've identified these shortcomings and are committed to revolutionizing the solar energy landscape. Our innovative approach addresses these market gaps, ensuring a seamless experience for distributors, installers, and end-users alike.

An One-Stop residential smart solar solution for homeowners who want to reduce their energy cost and minimize their carbon footprint.

The innovative system adopts a standardized and modular design, integrating solar panels, mounting structure, hybrid inverter, energy storage, cable set, and smart monitoring system to create an ONE-STOP residential energy solution for you.

iShare-Home

One-Stop Solution

Unified Brand & Single-window purchasement

Gain valuable time with a streamlined procurement process. Our single-window approach consolidates purchasing, saving you precious moments and eliminating the hassle of dealing with multiple suppliers.

One-Stop Delivery

Elevate Your Energy Journey with Our One-Stop Delivery: Solar Panels, Hybrid Inverter (complete with meter and CT), Energy Storage Battery, Mounting Structures, Cable Set, Smart Energy Management System, Heat Pump, EV Charger, and iBox for Full Protection of Your Electrical System.

One-Stop Service

Experience Seamless Excellence with Our One-Stop Service: From Systematic Design and Quality Warranty to After-Sales Support, Training, Delivery, and Packing - We've Got Every Aspect Covered.

Products Highlights

• Standardized Design

A Standardized BOM Featuring a standardized Bill of Materials (BOM), iShare-Home minimizes design time, streamlining the process for a more efficient and effective solution.

• Modular Design

Modular mounting structure, Modular battery Tailored Flexibility: Allowing for flexible configurations that cater to unique needs and preferences. **Adaptable Growth:** Ease to be scalable, iShare-Home accommodates future upgrades seamlessly. Modular mounting structure, providing flexible adaptation to different roofs.

• Modular Packaging

Packed and Delivered as Set Mounting structure and cable are packed and delivered as set to reduce the time and errors of primary and secondary sorting.

• Simple Installation

Pre-installed cable terminals, Battery installed in stack, Plug and Play Preassembled parts, including cable terminals, mounting structure, and stacked battery installation, make it a plug-and-play system, reducing installation time by up to 17%.

• Smart Operation and Maintenance

Total Control at Your Fingertips Energy generation and consumption through continuous, real-time system monitoring.

Smart Control strategies Intelligent management of all devices, including Inverters, energy storage, heat pumps, charging stations, etc. for cost-effective and eco-friendly energy usage, optimizing control strategies for maximum savings.

Adaptable Connectivity Reserved interfaces seamlessly integrate with smart devices, turning your home into an intelligent technology hub.
7/24h Intelligent Management.

Unified Brand & Single-window Purchasement

One-Stop Delivery

One-Stop Service

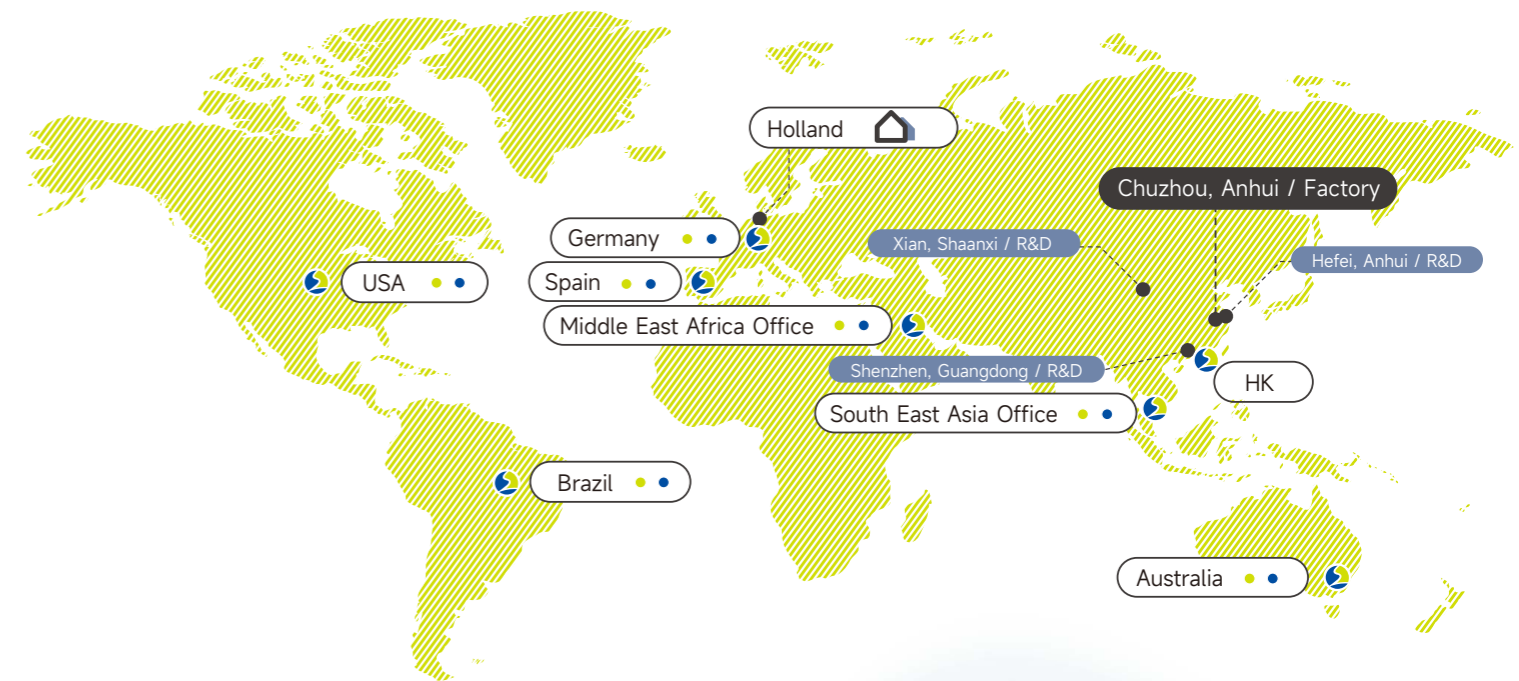

Localization of iShare-Home

 Base
 Marketing Center
 Service
 Warehouse

R&D Center

Factory

In terms of localization construction, we have local companies, local warehouses, and local service teams to support various service demands

24/7 Service

Local service hotlines are set up in various regions around the world to provide prompt assistance. We strive to respond to inquiries within one hour.

Training and Support

We are committed to offering comprehensive training and support. Any inquiries received via email will be addressed within two hours.

Processing within 3 Business Days

In order to ensure efficient maintenance and replacement services, we have established spare parts centers and logistics networks in different sales regions worldwide. Upon receiving equipment requiring repair, we guarantee a rapid response and aim to resolve the issue within three business days.

7 Points Advantage Really Easy For Installers

7+

+ Design

- Saving design time
- Reducing design costs

+ Purchase

- Single-window procurement
- Single purchase contract and payment terms
- Direct supply from the factory, eliminating intermediaries

+ Delivery

- Distribution from localized warehouse
- An one-off delivery of the complete equipment
- Short delivery periods (within one week)
- No secondary packaging and direct delivery to end customers

+ Installation

- Pre-installed terminal connectors for wiring harnesses, enabling plug and play wiring
- Battery stacked installation, offering convenience and speed
- Modular mounting structure, providing flexible adaptation to different roofs

+ Service

- Systematic training of Installation and commissioning
- Localized technical support services during pre-sales, sales, and after-sales

+ Warranty

- Single liability warranty
- Original equipment manufacturer warranty

+ Save

- Reduce capital occupation
- Achieving optimal inventory circulation
- Direct delivery from warehouses to end-user households

The power generation is calculated based on Madrid, Spain. The annual peak sunshine hours are 1760h.
Each 1kWh generated reduce 0.997kg of CO₂.

PRODUCT INTRODUCTION

N Type

Monofacial Module (Full Black) SL-108NA-425

Bifacial Module (Full Black) SL-DG108NA-425

- Excellent Anti-PID performance
- Leading module efficiency in industry, up to 21.76%
- Excellent wind and snow loads up to 5400Pa under specific installation methods
- Lower current, higher power generation, lower risk of hot spots
- Excellent low irradiation performance
- 12 years product quality warranty, 30 years linear output power warranty

- Bifaciality is up to 80%, up to 30% more energy yield than conventional modules
- Leading module efficiency in industry, up to 21.8%
- Higher power output even under low-light environment like on cloudy or foggy days
- Both Side cell, symmetrical design, low risk of micro-crack
- More extensive application scenes, such as BIPV, snow field, vertical installation, high humidity, strong wind and desert region
- 25 years materials warranty, 30 years power warranty

Maximum Power Output **425W**

Maximum Module Efficiency **21.76%**

Power Output Tolerance **0~+5W**

Hybrid Inverter

SL3-8KLH-W

Single-Phase

Flexible Design & Use | Energy Independence |
Convenient Installation & Operation | Smart Management

1

Flexible Design & Use

- DC 16A current input, compatible with high power PV module.
- 32A charge/discharge current.
- Supports application in retrofit scenario.
- UPS Switching time <10ms.

2

Energy Independence

- Fast charging / discharging to meet the demand of higher consumption.
- 10kW power of off-grid overloading@600s.
- DC/AC ratio up to 2.6.

3

Convenient Installation & Operation

- Unique push-in connectors for time-saving installation.
- Touch free commissioning with smartphone.
- Compact size and elegant appearance.

4

Smart Management

- Remote firmware update and customizable settings.
- Free online monitoring to enhance energy management for end user, installer and retailer.
- Programmable supply priority for PV, Battery or Grid.

Safety Regulation	IEC/EN 62109-1/2				
Others	IEC/EN 61000-6-1/2/3/4				

* Max. DC input voltage is 1000V without battery, 850V with battery. If the voltage is greater than the maximum, the inverter is in standby state.

** Max. grid input power refers to the max. power drawn from the grid, including the supply of off-grid load and battery charging.

SL-BH High Voltage Battery System

SL-BH series is a high voltage battery that offers multiple energy storage options through an expandable modular design (3-8 modules combined), which further simplifies installation and O&M with multiple smart functions. The safest battery cell technology (LiFePO₄) comes with a high charging rate, ensuring superior performance.

1 Original battery active balance technology

2 Flexible capacity options 7.68kWh to 20.48kWh

3 Easy installation with modular and stacked design

4 Remote diagnosis and real-time data monitoring

Battery						
Model	SL-BH-3-7	SL-BH-4-10	SL-BH-5-12	SL-BH-6-15	SL-BH-7-17	SL-BH-8-20

Mounting System for Tile Roof

Technical Parameter

Product Name	Solar Mounting System	Design Standard	EN 1991-1-1: 2002
Building Type	Pitched Roof		UNE EN1991-1-3-2018
Tile Type	Concrete Tile, Clay Tile, Slate Tile		UNE EN 1991-1-4-2018
Tilt Angle	15°-60°	Main Material	AL6005-T6(Anodized)
Wind Load	0.52KN/m ²	Fastener	SUS304 & Zinc-Nickel Alloy Electroplated Steel
Snow Load	0.6KN/m ²	Small Components	AL6005-T6(Anodized)
Applicable Solar Module	Framed	Color	Silver and black
Panel Layout	Portrait or Landscape	Certificate	TUV

	Item No.	Description	Material		Item No.	Description	Material
	51211786A	Rail H40	AL6005-T6		51230026R	End cap	Silica Gel
	31220174A	Rail Splice	AL6005-T6		55110091	Cable Clip	SUS304
	31101261A	Universal clamp kit	AL6005-T6		31510043A	Grounding Lug	AL6005-T6
	31101262A	Tile Hook	AL6005-T6		51500011F	Earthing Clip	SUS304
	31101263A	Hanger Bolt	AL6005-T6				

Mounting System for Flat Roof

1

Non-penetrating Solution

- Non-penetrating roof ballast mounting ensure water-tightness.

2

Fast and Simple Installation

- Fast and simple installation, PV panel's clamp are preassembled on front and rear leg.

3

Customized Design

- Ballast weight is customizable to different wind zone.

SPECIFICATION

System Name	Solar Mounting System
Building Type	Flat Roof
Tilt Angle	10°-15°
Wind Load	1.5kN/m ²
Snow Load	1.0kN/m ²
Applicable Solar Module	Framed
Panel Layout	Landscape
Design Standard	BS EN, ASCE7-10, BS 6399, AS-NZS 1170, GB 50009-2012, MS 1553
Material	AL-6005-T6, SUS304
Color	Silver/Black
Warranty	10-year

COMPONENT

1		Rubber block	5		Grounding lug kit
2		15° leg extension kit	6		South single leg kit
3		Bottom beam splice kit	7		East-west single leg kit
4		Rotary clip			C steel

Cable Set

SmartBox

SmartBox is an IoT intelligent hardware that real-time collects operational data from connected slave devices such as smart meters, inverters, charging stations, heat pumps, etc. The collected generation and consumption data are integrated to achieve intelligent centralized management of energy.

- 1 Plug and Play**
 - Instantly recognizes and integrates connected devices.
 - No need for complex device configurations.
- 3 Flexible Energy Management Strategies**
 - Offers a variety of selectable energy management strategies.
- 5 Optimal Utilization of Clean Energy**
 - Maximizes the use of renewable energy sources.
 - Helps users save on electricity costs.

- 2 Versatile Connectivity**
 - Supports Ethernet, WiFi, Bluetooth connectivity options.
 - Compatible with Modbus and other bus communication protocols.
- 4 Mobile App Integration**
 - User-friendly mobile application for convenient control and monitoring.

Heat Pump

SL-HP9KL/13KR / SL-HP18KR

1 Economical and Environmentally

- Heat pump uses the R290 eco-friendly refrigerant whose GWP is lower than 20 and helps curb global warming. The heat pump with R290 reaches higher efficiency than those with other refrigerants.

3 Full DC Inverter Technology

- The Heat Pump adopts full DC inverter technology, which can automatically adjust the frequency according to the ambient temperature to achieve a more constant temperature and bring users a quite comfortable experience at home.

5 IOT Function

- Connect the App to check the realtime running status, historical records and control the heat pump remotely.

7 Perfectly Compatible with Solar Systems

- Optimizing energy coordination control for height-ened efficiency and sustainable power utilization.

2 ErP Excellent

- Complying with ErP directives, Heat pump attains the A+++ energy label, which meets users' needs for low energy bills.

4 Low Noise

- Slenergy devotes to creating a pretty quiet running environment for the user through multiple noise reduction measures.

6 Colored Wire Controller

- The Heat pumps utilize an intelligent color LCD display with high definition interface and powerful functions, which is very friendly and helpful for users to view and control.
